ChatGPT Connector

The future is now! Benefit from the game changer that is AI – seamlessly integrated into censhare.

With the ChatGPT connector, you don't need any technical knowledge to make direct use of AI in the censhare XML content editor.

Whether you need to brainstorm ideas quickly, structure a text or automatically analyze an image, ChatGPT is your personal AI assistant.

Benefit today from integrating AI into your daily working life. Contact us if you have any questions!

Automatic product text creation

Based on a defined set of rules, product features are transferred to ChatGPT for automatic text generation. The results are adequate and relevant product texts. Without any costly project preparation or training of a language model.

Source of inspiration and information

ChatGPT supports users in their editorial work directly in censhare. Research or article suggestions on a topic are also possible, as well as the structuring or summarizing of existing articles.

Content analysis, categorization and transformation

For existing content, ChatGPT generates helpful keywords or optimizes SEO in the blink of an eye. Shortening and summarizing texts, adjusting the tone to suit target groups or rewriting a text using simpler words is also done at the push of a button. Images are analyzed to automatically generate names, descriptions, keywords, SEO and ALT texts (accessibility).
